Midland GIS Solutions has developed **CAMA Link**, a new integration tool for GIS and Vanguard users. The CAMA Link tool allows users to locate any parcel in Vanguard's CAMAvision® software and "link" directly to that parcel in their GIS program. Users can also select a parcel in the GIS and "link" to that same parcel in CAMAvision®. This tool provides a **quick and easy alternative** to look up parcel information within each program.

Counties with Web GIS and the CAMA Link feature can also reference any parcel in Vanguard's CAMAvision® software to the same parcel instantly in their Web GIS site. Midland GIS Solutions and Vanguard are **working together to bring you the best** in GIS and CAMA solutions!

CAMAlink

Connect your Web GIS site to Vanguard's CAMAvision® program.

Direct interface between Vanguard's CAMAvision® software & your GIS program.

Midland GIS Solutions received Vanguard Appraisal's 2007 Technology Partner of the Year Award for the development of integrated solutions for GIS and Vanguard users. **Midland and Vanguard have a close working relationship** to continue the development of GIS and CAMA solutions for clients.
